APPLIED ERGONOMICS

Index to Volume 27 (1996), Nos 1–6, pages 1–422

Articles

A case study of a human reliability assessment for an existing nuclear power plant *Kirwan, B., Scannali, S. and Robinson, L.* **289**

A study of some anthropometric characteristics of motorcycle riders *Robertson, S.A. and Minter, A.* **223**

Ageing, physical fitness and shiftwork tolerance *Härmä, M.* **25**

An exploratory study of the relationship between biomechanical factors and right-arm musculoskeletal discomfort and fatigue in a VDT data-entry task *Pan, C.S. and Schleifer, L.M.* **195**

Are there task specific performance effects for differently configured numeric keypads? *Marteniuk, R.G., Ivens, C.J. and Brown, B.E.* **321**

Designing better shift systems *Knauth, P.* **39**

Disorientation in hypertext: the effects of three text structures on navigation performance *McDonald, S. and Stevenson, R.J.* **61**

Does a back support have a positive biomechanical effect? *Magnusson, M., Pope, M.H. and Hansson, T.* **201**

Editorial: A model for solving work related musculoskeletal problems in a profitable way *Winkel, J. and Westgaard, R.H.* **71**

Ergonomic effects of a management-based rationalization in assembly work – a case study *Bao, S., Mathiassen, S.E. and Winkel, J.* **89**

Ergonomics in parallelized car assembly: a case study, with reference also to productivity aspects *Kadefors, R., Engström, T., Petzäll, J. and Sundström, L.* **101**

Ergonomic investigation of letter-carrier satchels: Part I. Field study *Dempsey, P.G., Ayoub, M.M., Bernard, T.M., Endsley, M.R., Karwowski, W., Lin, C.J. and Smith, J.L.* **303**

Ergonomic investigation of letter-carrier satchels: Part II. Biomechanical laboratory study *Lin, C.J., Dempsey, P.G., Smith, J.L., Ayoub, M.M. and Bernard, T.M.* **315**

Evaluation of perceived and self-reported manual forces exerted in occupational materials handling *Wiktorin, C., Selin, K., Ekenvall, L., Kilbom, Å. and Alfredsson, L.* **231**

Evaluation of key shapes on a touchscreen simulation of a specialised keypad *Breinholt, G. and Krueger, H.* **375**

Gender differences in performance of a selection test using the incremental lifting machine *Stevenson, J.M., Greenhorn, D.R., Bryant, J.T., Deakin, J.M. and Smith, J.T.* **45**

Guidelines for occupational musculoskeletal load as a basis for intervention: a critical review *Westgaard, R.H. and Winkel, J.* **79**

Human error identification techniques applied to public technology: predictions compared with observed use *Baber, C. and Stanton, N.A.* **119**

Improving shift workers' health and tolerance to shiftwork: recent advances *Kogi, K.* **5**

Industrial workstation design: A systematic ergonomics approach *Das, B. and Sengupta, A.K.* **157**

Load carriage using packs: A review of physiological, biomechanical and medical aspects *Knapik, J., Harman, E. and Reynolds, K.* **207**

Macro-ergonomic risk assessment in nuclear remediation industry *Guo, L., Genaidy, A., Christensen, D. and Huntington, K.* **241**

Maintaining safety and high performance on shiftwork *Monk, T.H., Folkard, S. and Wedderburn, A.I.* **17**

Measurements of movements during highly repetitive industrial work *Andersson, A., Nordgren, B. and Hall, J.* **343**

Methodological issues in the study of HIV+ individuals *Damos, D.L. and Parker, E.S.* **165**

Occupational health services for shift and night workers *Koller, M.* **31**

PATH: A work sampling-based approach to ergonomic job analysis for construction and other non-repetitive work *Buchholz, B., Paquet, V., Punnett, L., Lee, D. and Moir, S.* **177**

Postural analysis of nursing work *Hignett, S.* **171**

Rebuttal and reply to Stevenson *et al.* **133**

Self reported symptoms in the neck and upper limbs in nurses *Lusted, M.J., Carrasco, C.L., Mandryk, J.A. and Healey, S.* **381**

Static strength and physical work capacity of agricultural labourers in the central plain of Thailand *Mamansari, D.U. and Salokhe, V.M.* **53**

Stature and seat position as factors affecting fractionated response time in motor vehicle drivers *Scott, P.A., Candler, P.D. and Li, J.-C.* **411**

Subjective fatigue symptoms among computer systems operators in Poland *Kamieńska-Żyła, M. and Prync-Skotniczny, K.* **217**

Symptoms and sickleave among forestry machine operators working with pronated hands *Grevsten, S. and Sjögren, B.* **277**

Systems approach to clothing for disabled users. Why is it difficult for disabled users to find suitable clothing *Thorén, M.* **389**

Task analysis for computer-aided design (CAD) at a keystroke level *Chi, C.-F. and Chung, K.-L.* **255**

The impact of shift and night work on health *Costa, G.* **9**

The use of computer-generated bivariate charts in anthropometric design *Nah, K. and Kreifeldt, J.G.* **397**

The Rationalisation Movement in perspective and some ergonomic implications *Björkman, T.* **111**

The validation of three Human Reliability Quantification techniques – THERP, HEART and JHEDI: Part 1 – technique descriptions and validation issues *Kirwan, B.* **359**

Traversing step obstacles with manual wheelchairs *Petzäll, J.* **327**

Using icons to convey medication schedule information *Morrow, D.G., Leirer, V.O. and Andrassy, J.M.* **267**

Upper extremity musculoskeletal disorders at a pulp and paper mill *Silverstein, B.A. and Hughes, R.E.* **189**

Working practices in a perchery system, using the OVAKO Working posture Analysing System (OWAS) *Scott, G.B. and Lambe, N.R.* **281**
